

How to Buy Retractable Screen Doors

Wizard Screens encourages you to evaluate our competitor's products before purchasing a retractable screen. Here are some important questions to ask in your search to find the right screen for your application. Please use this form in organizing your research and making your final, informed decision.

	Wizard Screens	Brand 2	Brand 3
Does the screen installation require the use of silicon sealant to glue the screen to your house?	No. The Wizard screen housing has a special channel for mohair sealing material.		
Is there an available option to add a speed reducer? (1)	Yes (1)		
If so, what kind of speed reducer? (2)	Planetary Gear (2)		
Can I get a locking bar?	Yes		
How long is the warranty?	Lifetime (except screen fabric)		
Have you seen the warranty "fine print" & "exclusions?" (see mfg web sites!) (4)	See complete details on our web site (listed below). (4)		
How many colors are available?	10 standard, 200 custom		
Is the screen housing stylish? (rounded edges).	We designed the housing with no sharp edges, just rounded corners. It blends nicely with your door frame. It is the perfect compliment to a beautiful door.		
Is the housing low profile?	Yes ! 1 3/4" w X 1 13/16" d		
Do the housing end caps and door handles have color-matched plugs to hide the screws?	Yes

Is the screen material premium & heavy duty?	Yes. It is heavy duty pvc coated fiberglass (5-15 times stronger than standard window or door mesh.)		
How soon can I get one?	Large local inventory of all standard colors. Usually installed in 5 days or less.		
Is there an extra charge for patio slider door installations?	No		
Does the cost include installation?	Yes		
What is the cost of the screen?			

(1) Retractable screen doors without a speed reducer can be dangerous to children and pets. Speed reducers allow the screen to retract gently.
 (2) The fluid in liquid-based speed reducers tend to leak (not recommended). Wizard uses a dry, gear-based speed reducer that will not leak and our speed reducers come with a limited lifetime warranty.
 (3) Standard door size is up to 85" tall x 45" wide.
 (4) To get complete and accurate warranty information, always (always!) get the warranty in writing direct from the manufacturer's web site or other official written documents direct from the manufacturer. This is very important, as claims of "lifetime warranty" almost always have exclusions. Some are significant. For example, one manufacturer offers power coated products, but specifically excludes color changes and fading on powder coated components. This is significant, as it is difficult to repaint powder coated products Please consider also that many manufacturers warranties carry disclaimers that the factory warranty will be "in lieu of any other warranty, expressed or implied." We recommend that you read and consider all the listed warranty details and exclusions carefully. Complete text of the Wizard warranty is available on the www.wizardindustries.com web site.
